

by F.lli Consonni

Our company was founded in 1946 by brothers Attilio and Angelo Consonni, starting as a producer of period furniture and kitchen using different kinds of wood ash, cherry, oak, walnut, fir, and many others.

In 1965 Consonni Bruno, after an apprenticeship by master craftsmen and attending in a school of drawing, starts production of lounges in Baroque style, Louis XVI, Regency, etc. collaborating with the father Attilio that transmits all his experience. In 1972 the brothers Bruno and Mario Consonni founded the "F.lli Consonni s.d.f." continuing the tradition of furniture.

In 1974 the company becomes "F.lli Consonni s.n.c." and that year you decide to introduce the production of pendulum clocks crates and wall.

The manufacture of watch cases wows them to such an extent that decide to devote more time to research and development of this particular product by expanding its production with pendulum clocks crates from "Grand Salon".

Begins to emerge a real personal line of models who perfected in care and attention to detail. The commitment of the brothers brings the first results so as to introduce into its business sector mounting mechanisms and knowledge of the mechanical part.

The fruit of experience garnered over the years by experienced cabinetmakers, woodcarvers, polishers and designer, interwoven with the mastery of skilled artisans, is the high quality of our products. Each model suggesting accurate style, searching for new lines and the care for details and for selected materials, creating works intended to remain in the family assets.

The wide range of our products allows the client to always meet your needs and enhance daily environments.

64 years from the date of its foundation the company F.lli Consonni is proud to provide its customers with professionalism, reliability and high quality products guaranteed and certified.
